

**Waseda Institute for Advanced Study (WIAS)  
Research Plan**

<b>Name</b>	
<b>Affiliated Institution, Department and Position</b>	
<b>Research Topic</b>	

**Status of Preparations, Etc.**

- I. Write a concrete, clear description of the research topic, with a focus on the status of preparations and so on.  
If the research involves expansion on the results of research in a closely related topic or topics, please feel free to write about this aspect.
- II. Write about the status of activities toward the start of research, including the status of coordination and contact with researchers in partner countries in the case of joint international research.

**Purpose of Research**

Enter a clear, concrete description with a focus on the following points:

Background of research (events leading to formation of the concept, etc.)

Purpose of research (what is to be explained by the research, and how far is the research to proceed within the appointment period)

Distinctive and original points of scholarship contributed to the field in question by this research (or plan), as well as anticipated results and significance

How this research is situated in relation to related research in Japan and other countries

**Past Research Progress and Results**

Describe public research funding received for this research topic or closely related research topics in the past, together with the research category, period (fiscal year), topic name, and research expenses. Additionally enter a clear concrete description of the initial research projects, their progress, their results, and so on. Include research that has received funding in the past that is currently still in effect.

**Status of Research Activities and Relationship to this Research Plan**

Enter a concrete description of the status of other research you are currently participating in (type of research funding, period of the research, research topic, allocation of roles) and its relationship to the present research plan.

**Research Plan and Procedure**

I. Regarding the research plan and procedure for achieving the purpose of research:

Enter a concrete description of the research plan and procedure in chronological order.

II. Regarding the concrete schemes or contrivances employed to implement this research:

Describe, for example, ideas for conducting the research effectively, assistance from cooperating researchers that will facilitate the efficient conduct of research, and so on.
