

Financial Accounting Information

USUI, Akira

1. Area of expertise, research area, or current themes in his/her research

We discuss cutting-edge areas of accounting, finance, and related research. The main research subjects are (1) asset pricing theory, analytical modeling, and empirical studies in capital markets; (2) disclosure systems; (3) accounting and finance research using AI and machine learning; (4) management information disclosure strategy (for example, investor relations); (5) audit systems; (6) investment and financing; (7) M&A; (8) R&D; (9) executive compensation; (10) corporate governance; (11) big data analysis; and (12) sustainable investment.

2. Supervision Policy

We research various topics in the interdisciplinary field of accounting and related disciplines such as finance, economics, and law through both empirical and theoretical approaches. We also deepen our understanding of accounting expertise and accounting practice through normative and historical approaches. Among accounting research methodologies, we focus particularly on acquiring archival, analytical, and experimental methodologies.

3. Advice to prospective students

Doctoral students must consistently maintain a strong intellectual curiosity and engage in their studies with a clear sense of purpose.

Please design your research theme, objectives, and plan for completing your doctoral dissertation within three years.
