

# ASIA'S ENERGY TRANSITION: FINANCING DECARBONIZATION

November 15, 2022

Wednesday | 16:30-18:00

Building 19, Room 713, Waseda University

Asia is the region that relies most heavily on coal for its power generation, and also widely recognized as biggest market for renewable energy investment. Liquefied Natural Gas (LNG) will increasingly play a key role as a transition energy. Ammonia and hydrogen are regarded as new technologies that have a role to play in transition. This session we will consider some issues arising between technology and finance.

## **Mr. Munetaka Horiguchi**

Vice President - Structured Finance Director  
Chiyoda Corporation

Waseda Institute of Asia-Pacific Studies Colloquium Series  
Series on Global Capital Market and Economic Development in Asia

Moderator  
Associate Professor Tomoo Kikuchi  
GSAPS, Waseda University
