Q1. Please evaluate how well-organized the EAUI Summer School 2025 was.

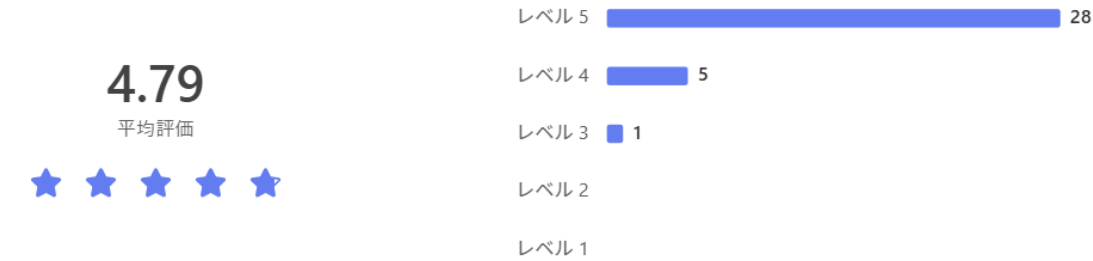

Q2. Please evaluate how reasonable the overall scheduling of the EAUI Summer School 2025 was over the course of the 5-day program.

Q3. Please evaluate how well-balanced and effective the format of the EAUI Summer School 2025 , which combined lectures, field trip, symposium, and student presentations was.

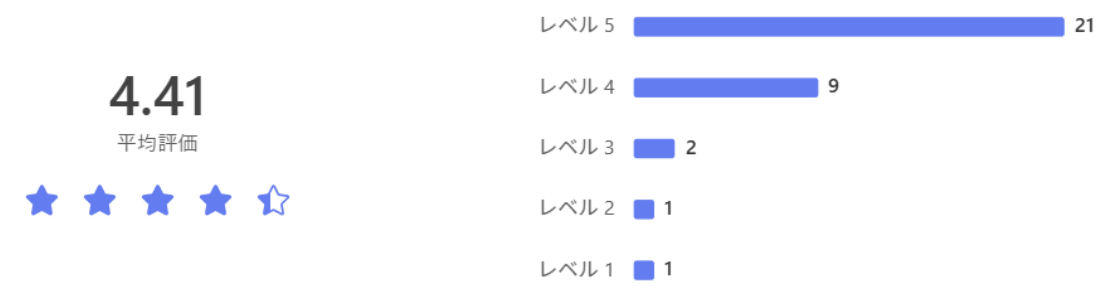

Q4. Please evaluate how informative the lectures were.

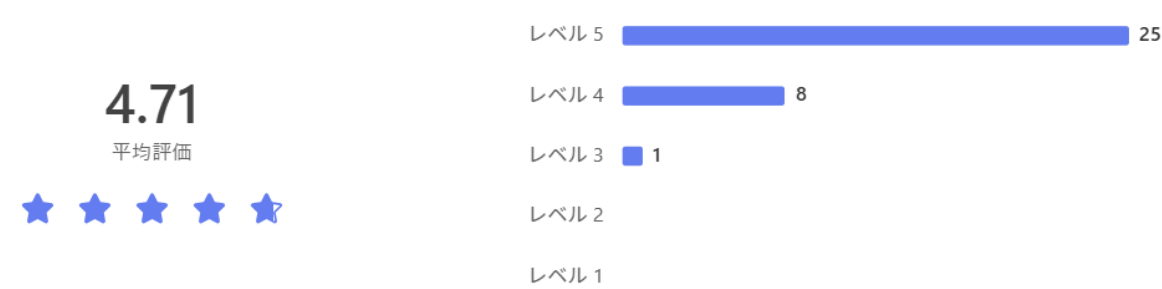

Q5. Please evaluate how structured and organized logically the lectures were.

Q6. Please evaluate how much the field trip contributed to new discoveries and learning for you.

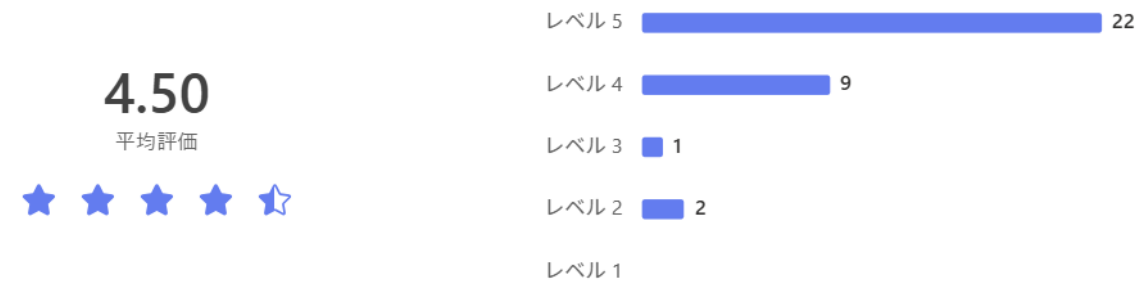

Q7. Please evaluate how informative and educational the International Symposium was.

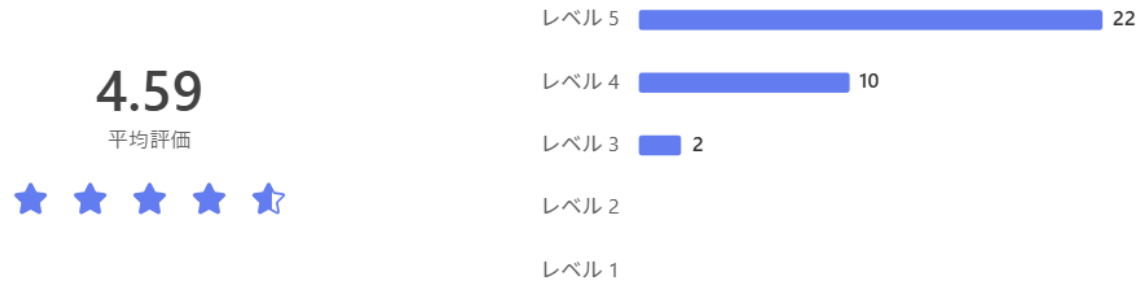

Q8. Please evaluate how educational or insightful the group presentation was for you.

Q9. Please evaluate how sufficient the allotted time was for the group presentation.

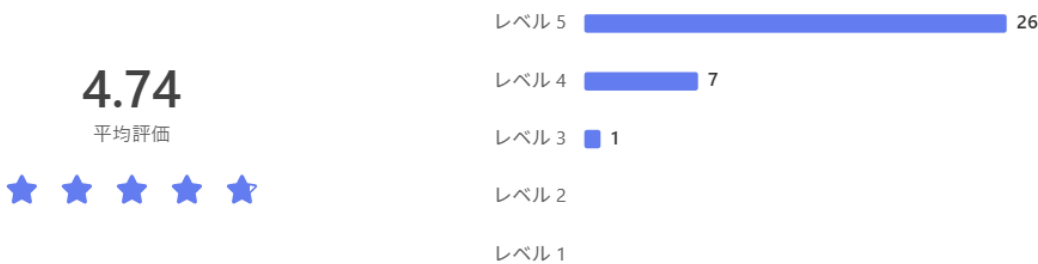

Q10. Please evaluate how helpful the Welcome Dinner and Farewell Party were in deepening interactions among participants.

Q11. Please evaluate how well the information about the EAUI Summer School 2025 was provided in advance.

Q12. Please evaluate how sufficient the logistical and administrative support was throughout the EAUI Summer School period.

Q13. Please share your overall impressions and any suggestions regarding the EAUI Summer School program.

- I really like meeting new friends and learning new knowledge and ahare some experiences together as a whole.

•It was a nice and enlightening experience but would’ve been better if it were to be extended longer. The schedule is a bit tough on the students.

•Thank you very much to Waseda. I will highly recommend this to my peers. I really appreciate all that you have done.

•Well organized overall. Perhaps information can be released slight earlier instead of a week in advance. Field trip could have been better timed instead of having it at noon, the hottest period of the day.

•Well organized. Everything is perfect. Maybe prolong the period of the summer school program, and cut some schedule one day.

•The programme has been insightful for everyone in fields that we have not dabbled in before and it was nice to immerse in different cultures. Would be good to have received the lecture slides in advance for reference during the lectures.

•Really nice! Thank you so much EAUI Summer School program! We have learned a lot!

•good structure, but many things outside the campus impacted my experience, especially the hotel which is not very good.

- Maybe it'd be better if we have more chances to do inter-group communication.
- Since it's my first time visit Japan I'm really excited, and the faculty staffs are very welcoming and friendly, which can help us to finish this 5 days study journey. For me I would like to say if Waseda can extend 5 days to 10 or 15 days could be better!
- It would be delighted if we have a kind of campuses tour around waseda.
- I found the EAUI Summer School program to be a highly rewarding and intellectually stimulating experience. The lectures covered a wide range of timely and relevant topics, and the interdisciplinary approach encouraged critical reflection and engaging discussions among participants from diverse academic and cultural backgrounds. I especially appreciated the opportunities for interactive dialogue with professors and peers, which helped me broaden my perspective on East Asian and global issues.
- Thank you very much for allowing me to participate in this summer school. I learned a lot (new) information and knowledge, even though they are not directly related to my current research interest, but I believe this new perspective will enrich my understanding of what currently happen in our world.

I also found new friends and networks who come across many countries and universities which will be a valuable aspects in my future endeavor.

- I thank you for the hard work these days, especially for the teaching assistants.

However, I have to acknowledge that these busy days drew me a little bit exhausted.

FIRSTLY, The time you arranger for the communication was not so sufficient. I can even figure out all of participants in the last days. Perhaps you can add one or two more days to take some field trips, so that we can interact with others more actively. Secondly, perhaps the time could be more flexible in order to let the participants can enjoy a more engrossing time when they participate lessons. Finally, it would be a great choice for you if you can add some interesting small games to let us familiar with each others. All in all, you did a great job. I thank you for organizing these school.

- Fantastic. Really appreciate GSAPS's support of such a well organized activity!
- It was stimulating summer programs for me because I could take a variety of classes and study with such excellent students.
- I think the program was an incredible opportunity and experience overall. I would definitely recommend it to other people in GSAPS. One thing I would probably enhance is group work and discussion sessions with the other groups of students as well!
- If we can have another day after closing for tourism in Tokyo it would be great
- Sincerely thank you for all of the efforts in organizing this great summer school! Thank you to all of the students who made their way to Japan, thank you Professors for preparing great lectures and being with us there whole 5 days and thank you the Waseda staff for always being there and working around the clock to ensure everything is smooth!
- First of all, I would like to thank the administrative staff at Waseda University for ensuring the smooth operation of the EAUI program. Overall, I was very satisfied with the lectures, symposium, welcome dinner, farewell party, and hotel arrangements. However, I do have a couple of suggestions. First, the schedule felt a bit too tight. In particular, we did not have enough time to properly prepare for our presentations.

Second, I wonder if it is really necessary to prepare presentations even for the field trip. Since we already had a presentation scheduled for the last day, having to present during the field trip as well made the schedule even more demanding. Also, from the perspective of a Korean participant, Shin-Okubo felt too similar to Korea and lacked novelty. It would be great if the field trip could be a day where we truly experience Japanese culture and have an opportunity to build stronger bonds with our group members.

- This program provides a great opportunity for us to exchange our thoughts and opinions towards different topics. Also, I made a lot of friends during the summer school. We all share our individual insights from different perspectives. It's a valuable experience for me!
- I am truly grateful for the opportunity to participate in the EAU Summer School program. It has been a meaningful and enriching experience that broadened my understanding of diverse cultures and perspectives. The program not only deepened my academic knowledge but also provided a valuable space for cross-cultural exchange and mutual learning. I especially appreciated the open discussions and collaborative environment, which allowed participants from different backgrounds to connect and learn from one another.
- I truly enjoyed the EAU Summer School program. The opportunities to communicate and interact with others is so valuable and meaningful for me. Thanks for the well-organized work of Waseda again!
- I had a very good experience having participated in the summer program at GSAPS. The structure of lecture, field trip, and experience in Japan worth to be remembered.
- everything is good, but it seems we have a too tight schedule.
- This program brings every student together to work as a unity. We exchange different ideas towards the same question from the different perspectives. It's a great program. All professors and staff are very kind and supportive.
- I appreciate every staff's help and respect the chance to do the field trip and we do get a lot in the heat! And welcome and farewell party is are truly valuable to connect with peers and professors out of class!
