

Lecture Course list 2020 Fall

Department	Course Key	Course Title	Credits	Term
Department of Electrical Engineering and Bioscience	5301GE1002	Molecular Cell Biology	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1007	Electronic Properties of Dielectrics	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1010	Advanced Electric Power Devices and Machines	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1014	Smart Grid and Frontiers in Electric Energy Systems	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1018	Power System and Nuclear Power Generation Theory	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1019	Advanced Vacuum Engineering	2	fall semester
Department of Electrical Engineering and Bioscience	5301GE1022	Physics of Semiconductor devices 1	2	fall semester

"Seminar course by your supervisor" will be also available other than these lecture courses.

Please ask your supervisor if you do not know which seminar you should take.

The seminar course list is also available on the following webpage:

https://www.waseda.jp/fsci/en/students/registration/#anc_12
