

Microsoft Teams (Guest participation)

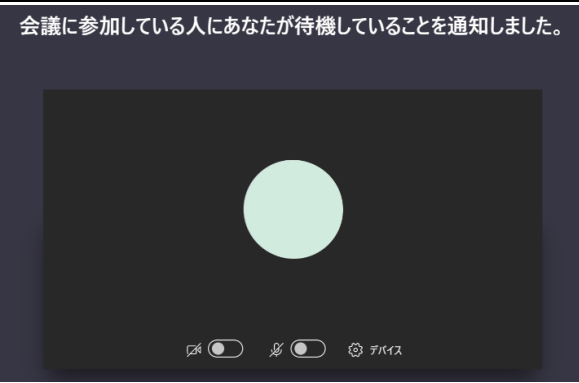

● Microsoft Teams can be used in the "app version" or "browser".

[1] Browser ⇒ Available on Google Chrome or Microsoft Edge (others are not supported)

[2] App version ⇒ Installation work is required, but there are few troubles.

[1] Teams meeting participation (guest participation)

<p>Sample</p> 	<p>① Click the URL obtained from the host by e-mail, etc., as shown in the sample image.</p> <p>It is recommended to connect to Google Chrome or Microsoft Edge</p>
	<p>② Click the connection method.</p> <p>When using a browser Go to ③</p> <p>App installed ④</p>
	<p>③ Click "Allow" to use the microphone and camera of the browser to ⑤</p>
	<p>④ Always check the relevant items in the app version ... and click Open Microsoft Teams</p> <p>If you check it, the app will start automatically from the next time.</p>
	<p>⑤ If you see a security warning, check only the top and click Allow Access</p>

	<p>⑥ After entering the name, "Join now"</p>
	<p>⑦ The meeting will begin with the permission of the organizer. Please wait until the organizer gives permission to enter the room.</p>

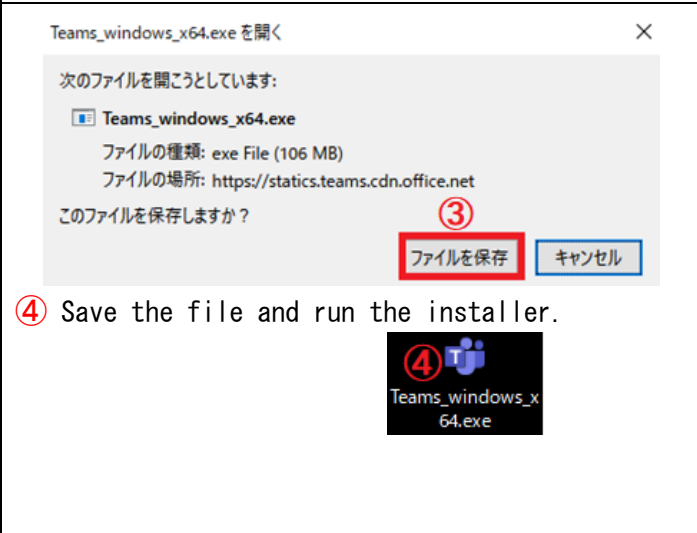

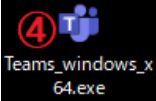

【2】 How to install the application version for PC

Please access the following official website and download and install the app.

<https://www.microsoft.com/ja-jp/microsoft-teams/download-app>

※If the installation fails, it is because the account information is stored in the browser. It is necessary to delete the cache etc.

If you have any questions about the method, please contact the IT service. (Extension 2500)

	<p>仕事用の Teams をデスクトップにダウンロード</p> 
 <p>④ Save the file and run the installer.</p> 	 <p>⑤ After the installation is complete, close without doing anything. Don't click [Start]. Guest participation is not possible from the app, so please use the URL obtained from the organizer.</p>
