第167回スポーツサイエンス研究会

SGU(文部科学省スーパーグローバル大学創成支援 早稲田大学スポーツ科学学術院 健康スポーツ科学モデル拠点) 協賛

日時 2017年5月9日(火) 16:30より

場所 早稲田大学 所沢キャンパス 100号館 第一会議室

演題

The cross bridge between research and clinical application at Stanford University Sports Medicine

Eitan Gelber, MA, ATC, CSCS (Senior Associate Director, Stanford University, USA)

Stanford University has been a leading figure in the area of research and innovation. The following presentation will include a brief overview of the multidisciplines of Stanford sports medicine with emphasis on the process of creating a research question from the clinician, to a study, and back to practical application within the Sports Medicine system. Specifically, the presentation will cover the process of putting together the Functional Lower Extremity Evaluation (FLEE), athlete's monitoring, and implementation of technologies in the rehabilitation process.
