ABSTRACT

This symposium spotlights the dynamism of urbanizing Asia in the context of ongoing environmental change. Amid immense growth, transition, and deepening challenges across the region, what new vulnerabilities are emerging and in what ways are cities trying to become more resilient? Addressing this question not only helps highlight the growing trends and potential horizons situated in Asia, but also presents academics and policymakers with broader analytical, methodological, and comparative innovations.

SPEAKERS

SESSION I

THE DYNAMISM OF INDONESIAN CITIES

Theme

Urban Corridors in Indonesia: Issues and Challenges

Delik Hudalah is a professor of metropolitan planning at the School of Architecture, Planning and Policy Development (SAPPD), Institut Teknologi Bandung (ITB), Indonesia, and a senior research fellow at the ITB Research Center for Infrastructure and Regional Development. He is also the Director of the Graduate Program in Urban and Regional Planning and in Transportation at the same faculty. In addition, he serves as an editorial member of the Journal of Regional and City Planning (JRCP) and an editorial board member of the Singapore Journal of Tropical Geography (SJTG).

Theme

Capital Transformation in Indonesia: From the Dynamism of Jakarta to Nascent Nusantara

Micah R. Fisher is a Fellow in the Research Program at the East-West Center. He conducts research on the human-dimensions of environmental change such as deforestation, land degradation, and urbanization in the Asia-Pacific. Recent research has focused on deforestation, land rights, and tenure policies in Indonesia and Southeast Asia; Disaster risk, vulnerability, and water insecurity in Greater Jakarta; Agrarian change and livelihoods in Sulawesi; and Technologies of Participation.

SPEAKERS

SESSION 2

THE DYNAMISM OF ASIAN CITIES

Theme

Regenerating Shrinking Towns and Cities in Japan

Hideki Koizumi is a professor at Urban Planning research unit in Department of Urban Engineering, University of Tokyo. He directs Co-creative Living Lab in Research Center for Advanced Science and Technology, University of Tokyo. He is an expert in collaborative planning, sustainable city planning, and digital smart city.

Theme

From Nature in the City to the City in Nature. The Case of Singapore.

Dr Rosita Samsudin's research centres around the issues of nature and human well-being in cities. She is currently researching social dimensions of nature in cities, perceptions and cognitions of nature, as well as nature and identity. She has also worked on various research on spatial equity of parks in cities, urban greening, urban climatic as well as evidence-based urban planning. She holds a PhD in Architecture from the National University of Singapore and is currently a Postdoctoral Fellow at the Tokyo College, the University of Tokyo.

Theme

Promoting Cultural Heritage through Hallyu Pop Culture

Riela Drianda is an associate professor at the School of Social Sciences, Waseda University. Her research interests span both pop culture and cultural tourism. Much of her work has been on identifying the growth potential of Asian pop culture for promoting urban culture and heritage assets. She also teaches in the area of urban studies and social design. During her term at Waseda University, she received two prestigious teaching awards from Peking University (2021) and Waseda University (2022).
