

In collaboration with

Community Sustainability and Resilience in the Post- Pandemic World

Tokyo, 30 - 31 January 2024

School of Social Sciences, Waseda University

Building 14, 8F, Room 801

Funded by

スーパースーパーグローバル大学創成支援事業/TOP GLOBAL UNIVERSITY PROJECT

Co-hosted by

資源管理のための伝統的制度の役割と持続可能性との関係「国際共同研究加速基金（国際共同研究強化（B））」

Preface

The COVID-19 has had a long-term impact on communities throughout the world, contributing to unprecedented global instability in recent years. The consequences of these public health catastrophic events have extended across borders, economies, and societal systems, changing the fundamental fabric of everyday life. The pandemic has exposed and exacerbated urban and rural communities' disparities, prompting a reassessment of how cities, small towns, and rural areas should be developed to ensure greater inclusivity and resilience. However, as this health crisis subsides, a complex tapestry of problems has gradually emerged, such as economic fallout, territorial disputes, and environmental challenges, complicating the path to recovery and resilience for many regions. As the world continues to traverse this difficult era, it has become essential to emphasize dialogues and initiatives that can shape the collective understanding and response to the ongoing and upcoming challenges.

This symposium aims to foster a collaborative environment where diverse ideas and perspectives can be shared and explored. It provides a platform for cross-disciplinary dialogues on community sustainability and resilience in the post-pandemic world. The discussions will revolve around practical strategies, innovations, and collaborations that empower communities to shape their livelihood and overcome challenges. It will further facilitate collaboration across sectors and nations, enhancing communities' ability to adapt, learn, and thrive in uncertain circumstances. Likewise, the symposium is expected to promote a collective commitment to fostering communities' well-being, ensuring that recent years' transformative impacts catalyze positive change.
