MEXT guidelines for calculating Employment Rate

Employment Rate equals number Employed (A) divided by the number of Employment Seekers (B) (X100).

Employed (A)

In regular full-time employment (or with an official offer of employment), or in other employment at 30~40 hours per week for one year or more (including full-time contract employees).

Employment Seekers (B)

Employment Seekers are those who actively search during their final year of study for employment to start soon after graduation. Calculated here as the sum of Employed (A) (excludes self-employed) and Seeking Employment.

Detailed results are as follows (by each Bachelor’s/Master’s program).
